Profile Summary

Computer Science student specializing in **Blockchain Technology** with a strong interest in **software development**, **problem solving**, and **Web3 technologies**. Familiar with Python, Java, C++, HTML, CSS, JavaScript, Solidity, MySQL, and blockchain fundamentals. Currently strengthening **Data Structures and Algorithms using C++** while building practical software and Web3 projects.

Education

Bachelor of Technology (Blockchain Technology) **2024–2028**
CGC University, Mohali
Latest SGPA: **8.10**

Intermediate (Class XII) **2023**
Bihar School Examination Board
Percentage: **73.4%**

Matriculation (Class X) **2021**
Bihar School Examination Board
Percentage: **77.4%**

Projects

Blockchain Credential Verification System

- Built a **blockchain-based system** to verify academic credentials securely.
- Developed a **Solidity smart contract** to store certificate hashes and enable decentralized verification.
- Integrated **MetaMask** for wallet connectivity and blockchain interaction.
- Used **IPFS** for decentralized certificate storage.
- **Tech Stack:** Python, Solidity, Ethereum, IPFS, MetaMask, ethers.js, HTML, CSS, JavaScript

BREACH & ESCAPE – SECTOR A

- Worked on an **escape-room-style Capture The Flag** cybersecurity event.
- Configured and tested a **CTFd-based environment** containing multiple rooms and challenges.
- Worked with **Docker, WSL, networking concepts**, and local deployment.
- Contributed to challenge flow, testing, deployment, and participant management.
- **Tech Stack:** CTFd, Docker, WSL, HTML, CSS, JavaScript, Networking

Terminal Based Portfolio

- Developed an **interactive personal portfolio** using a terminal-style interface.
- Designed **command-style interactions** to present projects, skills, and personal information.
- **Tech Stack:** HTML5, CSS3, JavaScript

Skills

- **Programming Languages:** C++, Python, Java, JavaScript, Solidity
- **Web Development:** HTML5, CSS3, JavaScript
- **Data Structures & Algorithms:** C++ (DSA), Arrays, Strings, Hash Tables, Stacks, Linked Lists, Recursion
- **Database:** MySQL, DBMS Fundamentals
- **Blockchain & Web3:** Blockchain Fundamentals, Smart Contracts, Ethereum, IPFS, MetaMask, ethers.js, Remix IDE
- **Tools:** Git, GitHub, VS Code, Docker, WSL, CTFd
- **Core CS Concepts:** Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Computer Organization and Architecture
- **Soft Skills:** Communication, Problem Solving, Leadership, Accountability, Team Collaboration

Achievements / Participation

- Member of **DevDen Tech Club**, contributing to technical activities and project-based initiatives.
- Worked on organizing and developing the **BREACH & ESCAPE – SECTOR A** cybersecurity CTF event.
- Participated in technical projects and **hackathon-oriented activities** involving blockchain, cybersecurity, and software development.
- Built and presented an **air quality monitoring system** prototype for monitoring environmental air quality.

Certifications

- **AI Skills Passport** – EY and Microsoft
- **Java Basics** – HackerRank
- **Python Basics** – HackerRank
